MERLOT

TUSCAN SUN

CAPPUCCINO

COPPER

CHESTNUT

The color selector is designed to assist you in making your selection for Cohills Pro Series® Metal Essence Metallic epoxy colors. Cohills Pro Series® Metal Essence Metallic pigment packs are measured by weight (not volume) and are designed to be added to 100% solids epoxy. 1 pigment pack should be added to 1¼ gallon of an epoxy base. Mix thoroughly for 3 minutes to insure proper dispersion. Cohills Pro Series® Metal Essence Metallic pigment packs may be used in other clear vehicles such as polyurethane, acrylic sealers and water-borne epoxies, all with different effects. Be sure to thoroughly read all application data on whatever vehicle you are adding the Metal Essence Metallic pigment packs to. Due to reproduction limitations, it is necessary that we reserve the right to allow for reasonable variations of application. Printed colors show approximate color without affect of dispersing techniques, finishing techniques or application procedure. Variation of application will also affect the final appearance. It is highly recommended that you do a sample test area before installation.
